Radon Mitigation

Dear << Leaseholder and Co-Leaseholder >>:

Please be advised that a contractor will be installing a radon mitigation system in your basement or crawlspace on [Enter installation date]. This system will reduce the level of radon gas in your home.

Background: Based on radon testing results received in 2018 your unit had radon gas levels above Health Canada guidelines. Manitoba Housing is following suggested Health Canada guidelines and will install a radon mitigation system to reduce the radon gas concentration in this unit to below the recommended level.

In preparation for the contractor's visit, please move all belongings at least three feet away from the walls in the basement if it is an unfinished basement. If you have a finished basement then move your contents away from unfinished walls in the basement utility room or laundry room.

Regards,
